

Learning agreement

Spec MSc in Chemical and Molecular Science

The program of the specialized Master in Chemical and Molecular Sciences comprises 90 ECTS Credits. In this research-oriented program, 60 ECTS Credits have to be earned with the Master's thesis (including defense and exam). **The other 30 ECTS Credits consist of coursework (9 ECTS from mandatory modules, at least 9 ECTS from core electives, the rest from electives).** The courses to be attended are compiled individually for each student depending on the student's prior education and the field of research of the Master's thesis and are recorded in this learning agreement. The agreement is then signed by the student, the PI responsible for the Master's research and the study advisor of the specialized Master's program.

Furthermore, the co-examiner of thesis and exam has to be defined already at this stage.

Student: _____ Matr. No.: _____

Responsible PI: _____

Co-examiner: _____

Study advisor: _____

Core electives (at least 9 ECTS): The modules have to come from the core electives of the Master's program in Chemistry (fill in module number, title and ECTS).

1. _____ ECTS _____
2. _____ ECTS _____
3. _____ ECTS _____

Electives: They have to come from the electives or special lectures of the Master's program in Chemistry or of related programs (fill in module number, title and ECTS).

1. _____ ECTS _____
2. _____ ECTS _____
3. _____ ECTS _____
4. _____ ECTS _____
5. _____ ECTS _____

(for more modules use additional sheet)

Substitution of the mandatory modules (9 ECTS) (only in exceptional cases!!!)

- MDS 101 (4 ECTS)** substituted by: _____ ECTS _____
- CHE 435 (5 ECTS)** substituted by: _____ ECTS _____
